

PALISADES COMMONS

Palisades Park, New Jersey

This project was the redevelopment of two existing, two family residences. The proposed development included residential building with thirteen units. The building contained nine, individual garages.

Neglia Engineering Associates responsibilities included regulatory coordination and design, for all site utilities, infrastructure, and site development. Site development activities included parking lot, site access, stormwater management and conveyances.

After the Borough and regulatory approvals were obtained, Neglia Engineering Associates provided construction stakeout services for all site design components including foundations, curbing, utilities, and stormwater management and conveyances.
